

ABSTRACT

The present invention provides an electronic system for facilitating communication between a presenter and a plurality of participants over a communication network without downloading software to the presenter and participant computers. The system includes a presenter computer having a graphical user interface to control the display of a presentation, authorize participants to pose a question, and respond to the question; a plurality of participant computers each having a presenter graphical user interface for viewing the presentation, requesting permission to pose a question, and generating the question; and a system server configured for brokering communication between the presenter computer and the plurality of participant computers.
